*AGI affiliated glazing contractors serve owners and construction managers with glass and metal solutions delivered on time and on budget. AGI member contractors and craftworkers are qualified to handle all interior and exterior architectural glass and metal applications. From design consultation and constructability reviews through final fabrication and installation, AGI members raise the bar for creativity, quality, safety, and value.*

### ABOUT THE COMPANY

When Mike D'alicandro founded Twindows, Inc. in 2000, he did so out of a home-office in Fishtown. The former aluminum products sales rep built a network selling windows to glazing subcontractors and decided the market had room for another company with a different approach. Armed with degrees in economics and a knack for entrepreneurship, Mike began his business with an emphasis on sustainability. The company soon signed with LU252 and expanded rapidly. Today the leadership team includes seasoned glaziers as well as Mike's son Nick.

## SUSTAINABLE FOCUS

“As a company, we’re interested in the working relationship between the environment and the built environment,” Nick explains. “It impacts the glazing industry from glass makeups to coatings. We’re taking into consideration making buildings more responsible with less emissions.” He adds that the market is rapidly expanding within the glazing industry. “It’s been a privilege to have been part of some really exciting green building projects already.”

## PRIDE & CREDIBILITY

In 20+ years, Twindows has earned a reputation for quality work. “Our credibility with clients is something we take pride in,” says Nick. The company offers strong teamwork and builds long-term client relationships. For example, Princeton, Temple, and Saint Joseph’s Universities and the University of Pennsylvania call on the company for regular glazing design assistance.

## NOTABLE PROJECTS

Twindows has become a local market leader in window replacements, curtain wall facades, building entrance systems, and custom interior glazing. The company’s notable projects extend from K-12 and higher education to hospitality and commercial properties. For the Drexel University-affiliated Powel Elementary and Science Leadership Academy Middle School (PSLAMS) in University City, Twindows installed a broad scope of aluminum curtain walls and storefronts, Duo-Gard polycarbonate panel systems, INTUS windows, and custom interior glazing features. For Philadelphia’s Solomon Solis-Cohen Elementary School scheduled for completion in Spring 2021, Twindows installed four different glass compositions to limit solar gain and added Low-E glass and aluminum sunshades to further contribute to the LEED certified project’s sustainability goals. Also in progress, Twindows’ work for Northern Burlington County Regional High School features interior and exterior glass with a layered and curved facade.

## SAFETY EMPHASIS

Twindows places special emphasis on safety. “At Twindows, we promote an injury-free environment at all times and stress the importance of a safe workplace in our facilities,” the company describes. Field personnel and foreman are all highly skilled and trained individuals representing LU252.
